TOTAL	23	319	103	1740	1	41	0	6

*2 possible in-school transmissions from week ending 12/8 that were unintentionally omitted from dashboard.

What is a possible in-school transmission? A possible in-school transmission is when an individual is identified as a close contact in school and subsequently tests positive. It is labeled as possible transmission because sometimes, in addition to the exposure at school, these individuals may also have had potential exposure outside of school.

What is probable in-school transmission? A probable in-school transmission is when an individual is identified as a close contact in school and subsequently tests positive and they had no other known exposure outside of school.

What happens when there is an in-school transmission? The Medical Advisory Team meets to review the data associated with the case, evaluates the mitigation strategies that are being employed and advises on next steps. Some of the things we evaluate are: the activities happening, air quality, distancing and masking in the areas where transmission may have happened.

My child has received both doses of the vaccine, how do I let the school know?

Typically, vaccine information from the state database (MIIS) is uploaded into our Electronic Health Record (EHR) within a few days of the vaccination.

You can also send a copy of their vaccination card to the school nurse and they can update the information in your student's EHR.

My child is fully vaccinated, does that change anything?

Two weeks after their second vaccine they will be considered fully vaccinated.

A fully vaccinated individual identified as a close contact, does not need to quarantine or participate in the Test and Stay program.

The CDC guidelines for a fully vaccinated close contact are:

- Test between Day 5 and Day 7 after last exposure
- Wear a mask indoors in public places for 14 days after exposure or until you have a negative test result.
- Monitor for symptoms for 14 days.
- If experiencing any symptoms (even mild ones), quarantine and get tested right away.

SCREENING AND TESTING

(provided by District)

December 9 - December 15, 2021

COVID Safety Checks*		Test and Stay tests**		Symptomatic tests**	
THIS WEEK	YTD	THIS WEEK	YTD	THIS WEEK	YTD
1832	19,580	301	3587	7	233

STATE DATA

STATE WEEKLY PUBLIC HEALTH INTERACTIVE DASHBOARD

Data can be found at this [link](#). Choose Interactive Dashboard, City and Town Data and the Weekly Status Map.

City/Town	Total Case Count	Case Count (Last 14 Days)	Average Daily Incidence Rate per 100,000 (Last 14 days)	Relative Change in Case Counts	Total Tests (Last 14 days)	Percent Positivity (Last 14 days)	Change in Percent Positivity
Northborough	1698	102	53.7	Higher	1980	5.66%	Higher
Southborough	794	52	38.4	Higher	1916	3.29%	Higher

Please note: Data for this table is based on information available in the DPH surveillance database at a single point in time. Case counts for specific cities and towns change throughout the day as data cleaning occurs (removal of duplicate reports within the system) and new demographic information (assigning cases to their city or town of residence) is obtained.

Parent/Guardian Q&A

CONSENT for TESTING

Information about weekly COVID Safety Checks (pooled screening)

I tested positive, completed my isolation, now what?

I got both my vaccines, does anything change at school?
